

Work Experience

Project Worker - CodeRunner plugin for SAMK Moodle

May 2021 - July 2021

Satakunta University of Applied Sciences (Finland)

Implementing CodeRunner plugin in SAMK Moodle. Study of required documentation. Innovating new exercises and quizzes categorised by topic. Configured for avoiding future students to cheat. Reported working hours.

Software Development Project for Mobile App

Feb 2021 - Currently

Lapland Diginepsy Clinic (Finland)

Build a web form with a questionnaire where user can tick checkboxes and write some details. The web give user written conclusion and draw some graph. The final product is bundled and uploaded to app and play stores. Use of HTML, CSS, Javascript and React.

Object Recognition Project with Neural Network

Jan 2021 - April 2021

Virelabs (Finland)

Develop an image detection system for recognising strollers and wheelchairs. Annotating images by using labeling. Training of a deep neural network to detect those objects. The image is processed with Yolo(v3) and Darknet locally by using "Virebox".

Carlos González Visiedo

Artificial Intelligence Student

Passionate about new technologies and happy to learn everything in this field. Good and efficient at programming and used to work under pressure. I love working in teams. I have no problem in travelling to continue training professionally.
